DETAILED ACTION

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

1. The disclosure is objected to because of the following informalities: It lacks proper headings (see above for proper formatting of the specification).

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. **Claims 1-5** are rejected under 35 U.S.C. 102(b) as being anticipated by Sugihara et al (JP 05-023094 (Abstract and English translation)).
4. **Regarding claims 1 and 3**, Sugihara discloses a process for producing wheat dough (see the translation of the example, section [0030], wherein a sponge cake dough containing wheat flour is produced), which comprises adding soybean protein as a plastic mixture with liquid sugar (see section [0030]-this is the oil-in-water type oil and fat composition). The preliminarily prepared soybean protein and liquid sugar plastic mixture is disclosed as the 'oil-in-water type oil and fat composition' which is produced by mixing a sugar liquid (see Abstract) and a gelling agent (see Abstract). It is further disclosed that the gelling agent can be soybean protein (see claim 2). This mixture will have the same composition as the claimed soybean protein and liquid mixture;

therefore it will have the properties, namely the plastic nature and water activity level of 0.95 or less, of the claimed material.

5. **Regarding claim 2**, Sugihara discloses that the soybean protein constituent (the gelling agent) of the soybean protein-liquid sugar mixture is 1.5-22.5% by weight (see abstract and claim 2).

6. **Regarding claim 4**, Sugihara discloses a recipe for a wheat dough, which includes ingredients totaling 360 parts. Of these 360 parts, 75 parts are the protein and liquid sugar mixture, which can contain 22.5% soybean protein, allowing for approximately 16.5/360 parts, or 4.6% by weight of the dough to be composed of the soybean protein constituent.

7. **Regarding claim 5**, Sugihara discloses the process for producing a wheat product according to claim 1, and provides an example for producing an angel food cake dough according to claim 1. The translation of Sugihara does not explicitly disclose heating the wheat dough. However, angel food cake is a baked product, therefore it is inherent that the dough will be heated.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
